United Storm Water is a Class A MBE Contractor founded in 1999 having demonstrated experience and expertise in storm water maintenance and BMP fabrication and installation. United holds the licenses and permits required for fulfillment of the contract and have successfully provided these services to

numerous public agencies for (25) years including CPS installation services for the City of San Bernardino in 2021 and 2022.

## **Scope of Work**

United shall provide all materials, labor, and equipment required to install approximately (124) Connector Pipe Screen (CPS) devices. Services include traffic control, pre-installation cleaning of the catch basins to be retrofitted, disposal of the extracted waste, staff gauge painting, and documentation to include before and after photos and an installation report. This project is subject to compliance monitoring and enforcement by the Department of Industrial Relations and prevailing wage rates apply.

## **Products to be Installed**

For this project United Storm Water proposes installation of the products listed below. All full trash capture devices have been approved by the Water Board, and the Mosquito and Vector Control Association of California (MVCAC):

### **Connector Pipe Screen (CPS)- Manufactured by United Storm Water**

United Storm Water will manufacture and install its own CPS devices.

- USW-1M1 Removable Screen With Swivel Access Plate
- USW-1M2 Removable Screen With Hinged Deflector Access
- USW-2M1 Fixed Screen With Swivel Access Plate
- USW-2M2 Fixed Screen With Hinged Deflector Access

All design options include mosquito abatement features and can be ordered with removable or fixed front screen panels. The USW-1M1 and USW-1M2 models have removable front screen panels that are best suited for shallow catch basin applications. The USW-2M1 and USW-2M2 models have fixed front screen panels that are best suited for deeper catch basins and or larger inlet/outlet pipe diameters.

Individual catch basin configurations will determine if USW-1M1/USW-2M1 (swivel access plate) or USW-1M2/USW-2M2 (hinged deflector) configurations will be the best design regarding accessibility for mosquito abatement activities. The swivel access plate models are used when there is not adequate clearance for a hinged deflector to open fully.

United Storm Water offers quality services that aid public agencies to remain in compliance with local and regional storm water regulations in a professional and workmanlike manner. United is a firm who is a leader in its industry and is always evolving to provide its customers with leading edge solutions. Thank you for your consideration of our proposal!

Sincerely,
