Project Considerations

Hardt and Brier Business Park Project is proposed as five (5) service commercial buildings.

The buildings are designed as an open campus concept as to not incorporate an institutional presence.

Project Considerations

- **Access:** Multiple buildings have driveways and parking spaces on Hardt St, including ADA and bicycle parking.
- **Traffic:** Traffic impact from the projects is predicted to be minimal by 2025.
- **Landscape:** Projects will have diverse landscaping, exceeding code requirements.
- **CEQA:** Proximity of projects led to a study and mitigation measures; invalidation would affect all projects.

Conceptuals

Recommendation

The Mayor and City Council:

1. Adopt a Resolution denying Appeal 24-02, thereby upholding the Planning Commission's denial of Appeal 24-01
